

OffenderConnect® Intake Kiosk

Convenient Booking Deposit Service for Corrections

Introducing the OffenderConnect® Intake Kiosk

Improve your booking process with the OffenderConnect Intake Kiosk. The OffenderConnect Intake Kiosk can decrease the amount of time it takes to book an offender into your system by using automation to quickly and accurately count any funds an offender may have in their possession.

You can reduce money handling at booking while streamlining the process to get funds onto the offender's trust account. The OffenderConnect Intake Kiosk uses a simple touch screen interface to allow corrections officers to quickly take cash and coins that might otherwise need to be logged as property, and instead add them to the offender's account.

How does it work?

The OffenderConnect Intake Kiosk has a bulk coin acceptor to process handfuls of change in its storage bin, where it is swiftly sorted and counted by the automatic coin sorter. Adjacent to the bulk coin sorter is the bulk bill acceptor that can handle up to thirty bills at a time to speed the counting process. Once the bills and coins have been counted, the OffenderConnect Intake Kiosk can generate a pair of receipts so that one is available to provide to the offender, and another for a file copy.

The OffenderConnect Intake Kiosk software contains an audit trail to assist with facility record keeping, and all cash and coins are accessible only to individuals doing cash pickup. The upper portion of the machine has a separate key, so that it can be opened by corrections staff to change the paper without having to call for technical support, while keeping the money in the machine secure.

Features and Capabilities:

Quickly and accurately handle deposits of offender funds at booking!

Easy to use touch screen interface!

Bulk coin and bulk bill acceptance!

All of the controls are within easy reach!

Reduce cash handling and gain efficiency for your booking process!

The OffenderConnect Intake Kiosk has been designed with a variety of mounting options, all intended to put the most frequently used controls at a convenient height. The bulk coin sorter, bulk cash acceptor and touch screen are all placed within easy reach to optimize the deposit process. The OffenderConnect Intake Kiosk also has the benefit of flexible options to ensure that the kiosk functionality can closely fit your needs.

Is the OffenderConnect Intake Kiosk right for my facility?

Facilities that want to reduce booking time and money handling while ensuring accuracy of deposited funds will certainly benefit from an OffenderConnect Intake Kiosk. Contact your Global Tel*Link® account representative for more information about this innovative time-saving tool!
