**GTL Expands Mobile IQ and Fusion Services with Law Enforcement and Correctional Partners**  
*Addition of a West Coast mobile forensics lab underscores success of GTL's delivery of "Intelligence as a Service" for its customers.*

#### **FOR IMMEDIATE RELEASE**

**Reston, Virginia – September 14, 2016 – [GTL](#)**, the leading provider of correctional technology solutions and an innovator in payment services solutions for government, today announced the expansion of its intelligence services as part of a strategic blended approach to combatting contraband mobile telephones in prisons and jails. GTL has built a West Coast mobile forensic lab that combines GTL's Mobile IQ product with its Fusion analytics team to offer value and a true integrated solution to law enforcement and correctional partners.

[GTL's Mobile IQ](#) solution is a proprietary approach focusing on three primary areas related to contraband cellphones. "Under the 'Detection, Extraction and Analysis' or 'D.E.A.' concept, we focus on a blended approach to detecting mobile telephones that have breached a correctional facility's perimeter illegally, extracting data forensically, and analyzing data to develop actionable intelligence for facilities. This intelligence solution is designed to combat the source and supply of contraband cellphones, leading to safer and more secure facilities," said Tim Skaja, Senior Vice President, Product Management and Service Delivery at GTL.

[GTL's Fusion](#) solution has GTL analysts working on-site with facility staff to provide support and critical services like proactive and reactive data analysis as well as forensic services. "The deployment of Mobile IQ and Fusion as a paired solution delivers significant value to our customers and the communities they serve. The West Coast mobile forensics lab is equipped with certified staff and state-of-the-art tools to conduct forensic mobile phone extractions to include JTAG and Chip-Off," added Skaja.

To learn more about Mobile IQ or Fusion "Intelligence as a Service" please [contact GTL](#) today.
