

Inspire[®] 2.0

Inmate Tablet – Inspire[®] 2.0

The 8” Inspire[®] Tablet—Inspire 2.0—is a hardened inmate tablet featuring an advanced technology platform and versatile operating program. It is a simple yet effective and secure way to increase efficiency for facility staff while finding more ways to connect inmates to their friends and family—a true win-win for any facility.

Built for Corrections. Build on an Android-based system, the Inspire tablet features a multi-layered security architecture that includes five distinct elements: network security, wireless security, operating system security, hardware security, and application security. Custom built by GTL with a secure operating system, the Inspire tablet is a corrections-grade product that offers vastly superior security over off-the-shelf tablets. GTL built Inspire from the ground up, blending our customized unique OS with secure, durable hardware (drop test certified under MIL-STD-810G), ensuring only GTL software can function on the hardware and vice versa.

Future of Inmate Communications. Inspire tablets are the next generation of secure inmate communications. For telephone calls, Inspire connects directly to GTL’s inmate telephone system via the secure wireless network, which means inmates will have a seamless transition from the traditional inmate phone and investigators will have the same analytical tools available—and as inmates make more calls from the privacy of their living quarters, investigators will have more opportunities to gather actionable intelligence. Inmates will also be able to send email-like messages via GTL’s instant messaging solution, which increases communication with their friends and family members and enables facilities to read all messages before releasing them to the inmates.

More Than Just a Phone. Most facilities start with GTL’s Inspire tablet program to provide wireless calling for the inmate population, however there are opportunities to utilize the full capabilities of the Inspire solution as correctional facilities become comfortable with the technology. The Inspire solution gives inmates the opportunity to build self-reliance and self-esteem through applications capable of providing educational programs, streaming music, email-like messages, games, eBooks, commissary ordering, FM radio, and electronic requests or grievances. By providing these extended capabilities in a correctional facility, the Inspire tablets can introduce powerful incentives for promoting positive behavior within the inmate population.

Specifications

CPU	RK3128 Quad-Core Cortex A7 1.3 GHz
GPU	Mali-400 MP2
Display	1280 x 800 pixels 8" IPS display
Network	Wi-Fi 802.11 a/b/g/n; Dual-band 2.4GHz/5GHz
RAM	2GB
Flash Memory	32GB
Battery	3.7V 8000 mAh Battery in Isolated Case; Up to 8 hours of screen time
Power Connection	AC 5V 1.5A barrel style power port
Data Connection	Micro USB 2.0 port (data only; no charging capabilities)
Audio Jack	3.5mm RCA Jack Audio In/Out
External Housing	Clear, Corrections Grade Housing Drop-Tested to MIL-STD-810G
Buttons	On/Off button; Volume +/- button
OS	Proprietary GTL OS built on Android v5.1; Signed, encrypted bootloader
Audio Formats	MP3, WMA, MP2, OGG, AAC, M4A, MA4, FLAC, APE, 3GP, WAV
Video Formats	MPEG1, MPEG2, MPEG4 SP/ASP GMC, XVID, H.263, H.264 BP/MP/HP, WMV7/8, WMV9/VC1 BP/MP/AP, VP6/8, AVS, JPEG/MJPEG up to 1080p 60fps
Power adapter	Clear, 6', one piece power adapter with barrel style connector
Headphones	HD earbud/mic combo. Includes 3 sizes of silicon eartips
Camera	2.0 megapixel front-facing camera
Radio	FM Radio
Warranty	1 Year Limited
