

MessageLink

AT-A-GLANCE

HIGHLIGHTS

- MessageLink provides an electronic communication portal (one- and two-way options available), reducing the amount of physical mail and contraband from entering the facility.
- Messages can be flagged for review using a custom keyword list and other criteria like sender or inmate recipient. Flagged messages can be handled in one of four ways:
 - Permit
 - Permit with Redaction
 - Permit and Watch
 - Block
- All messages are stored indefinitely, providing investigators with an archive of searchable data to reference at any given time.
- Friends and family members will manage and fund their accounts through the ConnectNetwork.com website.

BENEFITS

- Quickly and easily screen electronic correspondence between inmates and civilians.
- Fully configurable security settings allow only appropriate messages to be exchanged.
- Translate select message languages into English for reviews.
- Create a perpetual library of inmate correspondence specifically for investigative services.

For more information about our inmate messaging services, contact a GTL representative today for a demonstration or visit www.gtl.net/aagmessage.
