

TABLET SECURITY

GTL's locked-down Android™ approach is similar to what is used in newer military communication handsets.

Security Knows No Bounds

The main priorities of correctional facilities are security, safety, and control. GTL's main goal is to provide that to our customers. Our transformative technologies, such as the Inspire tablet, are specifically designed for the corrections environment. From the tablet itself and its operating system, to the network it connects to and the added security features that are enabled, Inspire is the latest in a long line of trusted and indispensable correctional tools.

Operating System

Highly-Secure Customized Android Firmware

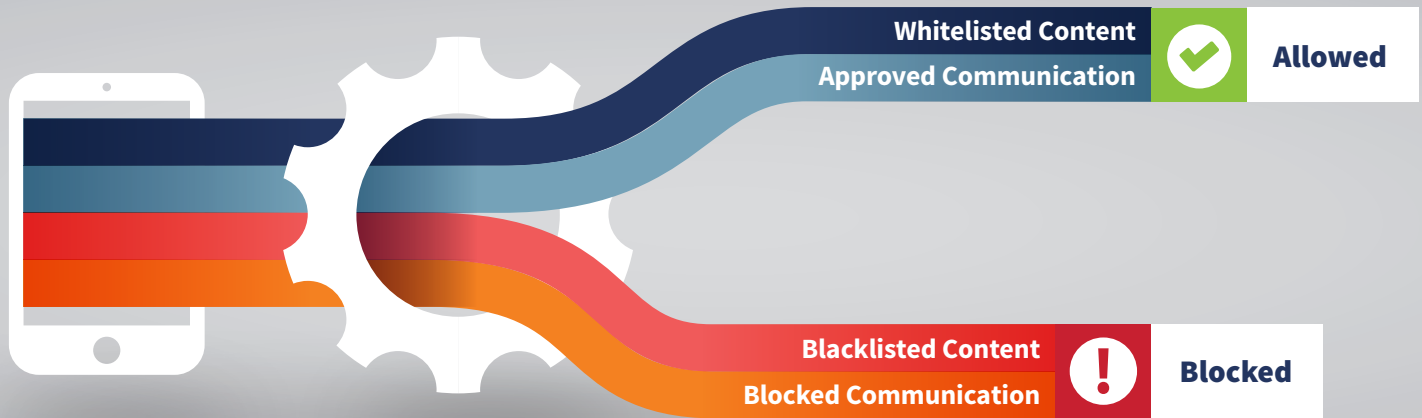

Added to Operating System (allows authorized access)

- ✔ Unique VPN + WPA2 Encrypted Connection Requirement
- ✔ Secure Login
- ✔ Secure Browser
- ✔ GTL Software Updates
- ✔ Centralized App Settings
- ✔ Customized Entertainment Apps
- ✔ Customized Efficiency Apps
- ✔ Customized Education Apps
- ✔ Customized Communication Apps

Removed from Operating System (restricts access)

- ✘ System Settings
- ✘ OS Updater
- ✘ User Authentication
- ✘ Wireless Control
- ✘ Web Browser
- ✘ Email
- ✘ Phone/SMS
- ✘ Music Player
- ✘ Video Player
- ✘ eBook Reader
- ✘ Camera/Album Apps
- ✘ Google Play Store

GTL Gatekeeper

At the center of GTL’s network security solution is GTL Gatekeeper, a full featured collection of security access control software. All network traffic is processed by GTL Gatekeeper, and only requests and responses that meet predefined requirements are allowed to pass.

GTL Gatekeeper provides threat avoidance measures by taking steps to prevent communications that could introduce risks such as spam or phishing, device-to-device communication, file transfers, and more.

Technical Features

- Full featured proxy server limits access to the Internet
- Internet whitelisted and blacklisted site lists at global and facility level
- Firewall
- Encryption to device (independent VPN tunnels between every tablet and Gatekeeper)
- Content filtering
- Secure by default (component failure cannot result in privilege escalation)
- Complete access control allowing restrictions per inmate
- No tablet-to-tablet communication
- Unique wireless charging standard for added security
- Unique code ensures only GTL hardware can interface with tablets
- Facial detection (additional authentication mechanism)

Staff Features

- Secure access through Command Center
- Live monitoring
- Detailed usage tracking by inmate and device
- Add, lock, remove tablet apps
- Detailed reporting/auditing
- Photo of every login
- One-click tablet disable and inmate-access disable

Why GTL?

Innovative Technology

The full-featured, turnkey solutions we provide are the most robust available, including tablets, phones, video visitation, investigative tools, jail management systems, and rehabilitative programs.

Secure Platform

GTL’s software and hardware ecosystem has been designed and built to meet the unique needs of the corrections industry, unlike any other provider.

Increased Usage and Operational Efficiencies

Our range of solutions—including communications products, investigative tools, automated workflows, payment and deposit options, and enterprise management solutions—drive increased system usage and unsurpassed operational efficiencies.

Customized Service and Support

We are dedicated to making your GTL technology experience efficient and hassle-free. We offer personal customer service with support professionals that are available 24/7.
