- ✗ Web Browser
- ✗ Email
- ✗ Phone/SMS
- ✗ Music Player
- ✗ Video Player
- ✗ eBook Reader
- ✗ Camera/Album Apps
- ✗ Google Play Store

## GTL Gatekeeper

At the center of GTL’s network security solution is GTL Gatekeeper, our full-featured collection of security access control software. All network traffic is processed by GTL Gatekeeper – only requests and responses that meet predefined requirements are allowed to pass, preventing communications that could introduce risks such as spam or phishing, device-to-device communication, and file transfers. Its embedded security features make it a worry-free solution.

### Technical Features

- Full-featured proxy server limits access to the internet
- Internet whitelisted and blacklisted site lists at global and facility level
- Firewall
- Facial detection
- Encryption to device (independent VPN tunnels between every tablet and Gatekeeper)
- Content filtering
- Secure by default
- Complete access control allowing restrictions per inmate
- No tablet-to-tablet communication
- Unique wireless charging standard for added security
- Unique code ensures only GTL hardware can interface with tablets

### Staff Features

- Secure access through Command Center
- Live monitoring
- Detailed usage tracking by inmate and device
- Add, lock, remove tablet apps
- Detailed reporting/auditing
- Photo of every login
- One-click tablet disable and inmate-access disable

GTL’s secure tablet is completely customized for correctional facilities. It seamlessly integrates with facility operations, making life easier and more productive for everyone.

GTL works to transform correctional facilities into rehabilitative environments by providing technology that meets facility needs, keeps communities safe, improves the wellness of incarcerated individuals, and fuels successful reentry for returning citizens. Leading the correctional technology field, GTL provides communication, rehabilitation, investigative, intelligence, finance, and reentry solutions.
