

# Offender Management System (OMS)

Increase facility efficiency, control, and safety by managing every aspect of incarceration

GTL's OMS is a web-based system that handles the unique needs of every inmate, ensuring a consistent process from booking all the way through release and beyond.

Managing the enormous amount of information attached to each inmate—accounting, booking, commissary, housing, and more—can be an overwhelming task. GTL's OMS can track all data points for every inmate, transforming jail management and simplifying your job.

## Features

**Over 180 modules** – Facilities can cover the complete range of jail management needs with more than 180 modules.

- **Inmate modules** store information related to a specific inmate, including, but not limited to: Booking, Housing, Assessments, Commissary, Medical, Case Management, Programs, and Release.
- **Facility (non-inmate) modules** manage functions pertaining to your correctional facility and actions that affect all inmates or specific groups of inmates (activity logs, movement and count, temporary release, etc.).

GTL is the leading jail management system in the U.S. county corrections market, managing the data of **1 in 4 incarcerated individuals.**

- **Accounting modules** manage bookkeeping functions at a facility (global accounting, transaction accounting, administrative accounting, and work release accounting).

- **Administrative modules** provide the tools for configuring the OMS to a facility's unique needs.

## Benefits

**Versatility** – You can choose from hundreds of pre-configured reports or create custom reports. GTL's OMS supports multiple databases and operating systems.

**Integration** – GTL's OMS supports multiple application services, such as correctional facility commissary, inmate trust fund, facility kiosk, inmate banking, and more.

**Unparalleled User Experience** – The GTL team will lead your department through the entire transition process. This includes meeting with facility staff to assess your needs and plan the optimal system configuration, as well as handling installation, facilitating on-site collaboration, and training to ensure smooth start up and maximized use of the new system.

GTL has worked side-by-side with facilities for over 30 years, gaining knowledge and insight into the management of facilities and the inmates they house. GTL's OMS is continually updated with new modules and enhancements that set the standard for jail management and meet the unique needs of every facility.

GTL's OMS equips corrections professionals with a **forward-thinking data management feature set** that allows officers and administrators to operate safe and secure facilities.

GTL works to transform correctional facilities into rehabilitative environments by providing technology that meets facility needs, keeps communities safe, improves the wellness of incarcerated individuals, and fuels successful reentry for returning citizens. Leading the correctional technology field, GTL provides communication, rehabilitation, investigative, intelligence, finance, and reentry solutions.
