

Video Visitation

Staying connected – safely and efficiently

Managing in-person visitation can be one of the most labor-intensive tasks in a correctional facility. But with ViaPath Technologies' Video Visitation, incarcerated individuals can see their friends and family directly, without the crowded lobbies and waiting times, streamlining the process for them and for your team.

As a supplement to traditional in-person visits, video visitation is a highly scalable, convenient solution that benefits everyone involved.

ViaPath's Video Visitation solution is the most robust offering in the corrections industry today. Video visits, both on-site and remote, efficiently and safely increase the number of allowable visits while reducing officer involvement, inmate movement, and expense.

Aiding in the effort to break the cycle of incarceration, video visitation offers family and friends an additional, convenient, "face-to-face" option for maintaining contact with their loved ones.

ViaPath manages over **13 million** visits each year with its video visitation and scheduling technology.

BENEFITS FOR FACILITIES

Operational Efficiencies

Our automated solution allows for online visitor registration and scheduling, shifting responsibility from staff to visitors. With less staff needed to manage the visitation process, they can focus on other job duties instead.

Reviewable Anytime, Anywhere

Our web-based application offers convenience and improves productivity by allowing staff to review video visitation sessions, set alarms, and control access from any web browser.

Increased Security and Control

Incarcerated individuals can visit without ever leaving their housing area, which saves time, decreases violent incidents, and closes off a key avenue for contraband.

Decreased Facility Traffic

Both on-site and remote visitation considerably reduces visitors and foot traffic within a facility.

BENEFITS FOR FAMILY AND FRIENDS

Increased Connections

Video visitation is on-demand, allowing family and friends to video chat with their incarcerated loved one whenever they want, pursuant to facility visiting hours.

Convenience, Savings, & Comfort

With video visitation, family and friends can realize immediate and personal communication without the hassle, expense, or inconvenience of traveling to a facility.

Flexibility

Family and friends can have a video visit with their incarcerated loved one when they want from wherever they want in three ways:

- ▶ At the Facility
- ▶ From Home
- ▶ On the Go

ViaPath works to transform correctional facilities into rehabilitative environments by providing technology that meets facility needs, keeps communities safe, improves the wellness of incarcerated individuals, and fuels successful reentry for returning citizens. Leading the correctional technology field, ViaPath provides communication, rehabilitation, investigative, intelligence, finance, and reentry solutions.
